# Community Improvement Districts

Report No. 2018-056 August 2018

auditor.mo.gov

### Findings in the review of Community Improvement Districts

Significant Weaknesses Exist in the State's CID Laws	Significant changes to the state's Community Improvement District (CID) laws are necessary to protect taxpayers. State law allows a CID to be formed and taxes and assessments to be imposed without adequate public scrutiny or sufficient public protections. State law also allows sales taxes to be imposed without voter approval and for significant conflicts of interest to potentially occur. CID imposed sales taxes do not have to be disclosed to the public and CID reporting compliance requirements are incomplete and lack enforcement power. State law allows CIDs to overtax the public and remit the excess taxation to conflicted parties. Annual reports of statewide CID sales tax collections and distributions published by the Department of Revenue (DOR) do not include taxes distributed to all districts.
Weaknesses Exist in Sales Tax Administration	The sales tax administration system in place at the DOR does not adequately track sales tax district boundaries, and the DOR does not have adequate procedures in place to ensure district sales taxes are correctly administered, charged, collected, and disbursed.
Noncompliance with Statutory Requirements	CIDs have routinely not complied with state laws regarding budget preparation, annual financial and performance reporting, Sunshine Law compliance, and holding an annual meeting. We determined 11 of the 15 (73 percent) CIDs reviewed did not properly adopt budgets or did not properly provide prepared budgets to the municipalities. Prepared budgets were also often incomplete and sometimes not approved timely. CIDs consistently failed to provide required annual financial reports to the State Auditor's Office and annual performance reports to the Department of Economic Development. We determined 3 of the 15 (20 percent) CIDs reviewed did not comply with the Sunshine Law by failing to prepare board meeting minutes with all required information. We identified 4 of the 15 CIDs did not hold an annual meeting during 2017 as required.
Due	to the nature of this report no rating is provided.

## NICOLE GALLOWAY, CPA Missouri State Auditor

Honorable Michael L. Parson, Governor and Members of the General Assembly, and Joel W. Walters, Director Department of Revenue Jefferson City, Missouri

We have audited certain aspects of the state's Community Improvement District (CID) laws and certain information related to a selection of CIDs, in fulfillment of our duties under Chapter 29, RSMo. Due to the increasing number of CIDs in the state, and the significant amount of public money collected and spent by such districts, state laws establishing CIDs are a significant issue to taxpayers. The scope of the audit included, but was not limited to, the year ended December 31, 2017. The objectives of our audit were to:

- 1. Evaluate internal controls over significant management and financial functions related to CIDs.
- 2. Evaluate compliance with certain legal provisions related to CIDs.
- 3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions related to CIDs.
- 4. Evaluate potential changes needed in state laws governing CIDs.

Except as discussed in the following paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

*Government Auditing Standards* require us to obtain and report the views of responsible officials of the audited entity concerning the findings, conclusions, and recommendations included in the audit report. Since there is no central agency charged with oversight of CIDs, we could not obtain views of responsible officials for the findings, conclusions, and recommendations outlined in findings 1 and 3 of the Management Advisory Report. We obtained the views of responsible CID officials and municipality officials and included them in the report where appropriate.

For the areas audited, we identified (1) deficiencies in internal controls over management and financial functions related to CIDs, (2) significant non-compliance with legal provisions related to CIDs, (3) significant weaknesses in CID management practices, and (4) significant weaknesses in the state laws for CIDs.

The accompanying Management Advisory Report presents our findings arising from our statewide audit of CIDs.

Mole L. Calley

Nicole R. Galloway, CPA State Auditor

The following auditors participated in the preparation of this report:

Director of Audits: Audit Manager: In-Charge Auditor: Audit Staff: Robert E. Showers, CPA, CGAP Wayne T. Kauffman, MBA, CPA, CGAP Matthew Schulenberg, CFE Michaela N. Horstman Hunter O'Donnell, M.Acct. Michelle Pummill Mackenzie J. Wooster

## Community Improvement Districts Introduction

Background	The Community Improvement District Act was established in 1998 and allows for the formation of community improvement districts (CIDs) under Sections 67.1401 to 67.1571, RSMo. CIDs are separate legal entities, either a political subdivision or a not-for-profit corporation, which are established to pay for either public improvements or private projects. The projects are generally financed by these districts through a sales and use tax, special assessment, or real property tax. As of December 31, 2017, approximately 428 CIDs existed throughout the state. During 2017, CIDs received more than \$74.3 million in revenues statewide.
Formation	According to Section 67.1411, RSMo, the governing body of any municipality or county may establish one or more CIDs in the manner provided in the Community Improvement District Act. Section 67.1461.1(16), RSMo, establishes powers of the district and allows the district to provide assistance to or to construct, reconstruct, install, repair, maintain, and equip various public facilities or improvements.
	calendar year from 1999 to 2017 for the 411 CIDs that responded to our questionnaire.

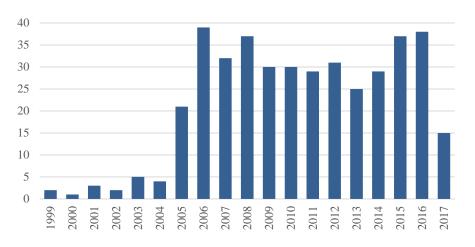

Figure 1: Number of CIDs formed by calendar year, 1999 to 2017

Source: Prepared by the State Auditor's Office (SAO) using data from questionnaires submitted to each CID in existence as of December 31, 2017.

The process of establishing a CID is initiated by the filing of a petition with the governing body where the proposed district is located. Such a petition must be signed by (1) property owners collectively owning more than 50 percent of the assessed value of the real property within the boundaries of the

Community Improvement Districts Introduction

proposed district and (2) more than 50 percent per capita<sup>1</sup> of all real property owners within the boundaries of the proposed district.

A petition to form must also include (1) a legal description of the proposed district, including a map illustrating the district boundaries; (2) the name of the proposed district; (3) a notice that the signatures of the signers may not be withdrawn later than 7 days after the petition is filed with the municipal clerk; (4) a 5-year plan stating a description of the purposes of the proposed district, the services it will provide, the improvement it will make and an estimate of costs of these services and improvements to be incurred; (5) a statement as to whether the district will be a political subdivision or a not-for-profit corporation, including the name of the not-for-profit corporation; (6) if the district is to be a political subdivision, a statement as to whether the district will be governed by a board elected by the district or whether the board will be appointed by the municipality; (7) if the district is to be a political subdivision, the number of directors to serve on the board; (8) the total assessed value of all real property within the proposed district; (9) a statement as to whether the petitioners are seeking a determination that the proposed district, or any legally described portion thereof, is a blighted area;  $^{2}$  (10) the proposed length of time for the existence of the district; (11) the maximum rates of real property taxes, and, business license taxes in the county seat of a county of the first classification without a charter form of government containing a population of at least 200,000, that may be submitted to the qualified voters<sup>3</sup> for approval; (12) the maximum rates of special assessments, and respective methods of assessment that may be proposed by petition; (13) the limitations, if any, on borrowing capacity of the district; (14) the limitations, if any, on the revenue generation of the district; (15) other limitations, if any, on the powers of the district; (16) a request that the district be established; and (17) any other items the petitioners deem appropriate.

Section 67.1421, RSMo, requires the municipal clerk to determine if the petition substantially complies with the requirements and for the governing body of the municipality in which the proposed district is located to hold a public hearing before the governing body can adopt an ordinance approving the petition and establishing a district as set forth in the petition.

<sup>&</sup>lt;sup>1</sup> As defined by Section 67.1401, RSMo, per capita is one head count applied to each individual, entity or group of individuals or entities having fee ownership of real property within the district.

<sup>&</sup>lt;sup>2</sup> As defined by Section 67.1401, RSMo, a blighted area is an area which (1) by reason of the insanitary or unsafe conditions, deterioration of site improvements, or the existence of conditions which endanger life or property by fire and other causes retards the provision of housing accommodations or constitutes an economic or social liability or a menace to the public health, safety, morals or welfare in its present condition and use; or (2) has been declared blighted or found to be a blighted area pursuant to Missouri law.

<sup>&</sup>lt;sup>3</sup> As defined by Section 67.1401, RSMo, a qualified voter is registered voters or the owners of one or more parcels of real property located within the district.

Community Improvement Districts Introduction

Governance CIDs are governed by a board of directors. If a district is a political subdivision, the district shall be governed by a board consisting of at least 5 but not more than 30 directors. Directors must be (1) at least 18 years old, (2) be either (a) an owner of real property or of a business operating within the district or (b) a registered voter<sup>4</sup> residing within the district, and (3) any other qualifications set forth in the petition establishing the district. If there are fewer than 5 owners of real property located within a district, the board may be comprised of up to 5 legally authorized representatives of any of the owners of real property located within the district. The board can either be elected or appointed, as provided in the petition. After the district's formation has been approved, the board has the authority to carry out the purposes and provisions of the Community Improvement District Act. If the district is a not-for-profit corporation, the election and qualification of members to the board of directors must be in accordance with Missouri's Nonprofit Corporation Act (Chapter 355, RSMo). Allowable projects CIDs have the powers to provide assistance to or to construct, reconstruct, install, repair, maintain, and equip any of the following public improvements:5 Pedestrian or shopping malls and plazas. Parks, lawns, trees, and any other landscaping. Convention centers, arenas, aquariums, aviaries, and meeting facilities. Parking lots, garages, or other facilities. Paintings, murals, display cases, sculptures, and fountains. Any other useful, necessary, or desired improvement. CIDs also have the power to demolish and remove, renovate, reconstruct, or rehabilitate any building or structure owned by a private property owner if the area is declared to be blighted.<sup>6</sup>

<sup>&</sup>lt;sup>4</sup> As defined by Section 67.1401, RSMo, a registered voter is a person(s) who resides within the district and whom are qualified and registered to vote pursuant to chapter 115.

<sup>&</sup>lt;sup>5</sup> Section 67.1461.1(16), RSMo.

<sup>&</sup>lt;sup>6</sup> Section 67.1461.2(1), RSMo.

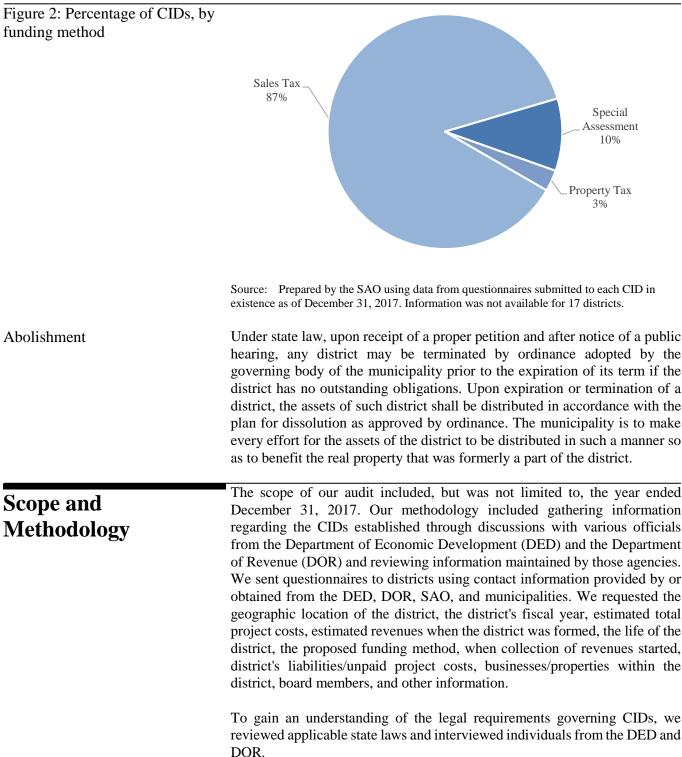

Community Improvement Districts Introduction

Funding methods	State law allows CIDs 4 different methods to generate revenue:
	1. Sales and Use Tax - Any district formed as a political subdivision may impose by resolution a district sales and use tax of up to one percent on retail transactions, subject to exceptions cited in state law.
	2. Real Property or Business License Tax - The district may levy by resolution a tax upon real property or on any business located within the boundaries of the district, provided no such resolution shall be final nor shall it take effect until the qualified voters approve the tax that the resolution seeks to impose. The district may levy a real property tax rate lower than the tax rate ceiling approved by qualified voters and may increase that lowered tax rate to a level not exceeding the tax rate ceiling without approval of the qualified voters.
	3. Special Assessments - A district may levy by resolution one or more special assessments against real property within its boundaries, upon receipt of an in accordance with a petition signed by (1) owners of real property collectively owning more than 50 percent by assessed value of real property within the boundaries of the district, and (2) more than 50 percent per capita of the owners of all real property within the boundaries of the district.
	4. To fix, charge, and collect fees, rents, and other charges for use of any of the following:
	• The district's real property, except for public rights-of-way for utilities.
	• The district's personal property, except in a city not within a county.
	• Any of the district's interest in such real or personal property, except for public rights-of-way for utilities.
	The majority of CIDs are funded with sales tax. Special assessments and property taxes are funding methods used by approximately 13 percent of the districts. Figure 2 breaks down the percentage of CIDs by funding method for CIDs formed through December 31, 2017, that responded to our

questionnaire.

Community Improvement Districts Introduction

## Community Improvement Districts Introduction

We also selected 15 CIDs across the state to review in more detail. The districts selected and their approving municipalities are:

	Approving
District Name	Municipality
76 Entertainment CID	Branson
BaratHaven CID	Dardenne Prairie
Independence Events Center CID	Independence
Capital Mall CID	Jefferson City
Hope Valley CID	Joplin
12th & Wyandotte CID	Kansas City
Ward Parkway Shopping Center CID	Kansas City
Park Ridge CID	Lee's Summit
Miner Gateway CID	Miner
North Oaks Plaza Shopping Center CID	Northwoods
2317 Belt CID	St. Joseph
East Hills CID	St. Joseph
Downtown St. Louis CID	St. Louis
Liberty Commons CID	St. Robert
Black Mountain CID	Van Buren

During 2017, the SAO performed individual audits of the BaratHaven CID,<sup>7</sup> the Independence Events Center CID,<sup>8</sup> the Ward Parkway Shopping Center CID,<sup>9</sup> and the North Oaks Plaza Shopping Center CID.<sup>10</sup> These districts were also included in our review of additional detail during this audit.

During our review of these districts, our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; testing selected transactions, and performing on-site inspections and observations. These districts were not selected due to any known issues or concerns, and are considered representative of the entire population of CIDs throughout the state.

<sup>&</sup>lt;sup>7</sup> SAO, *BaratHaven Community Improvement District*, report number 2017-121, issued October 2017.

<sup>&</sup>lt;sup>8</sup> SAO, *Independence Events Center Community Improvement District*, report number 2017-136, issued November 2017.

<sup>&</sup>lt;sup>9</sup> SAO, *Ward Parkway Center Community Improvement District*, report number 2017-147, issued December 2017.

<sup>&</sup>lt;sup>10</sup> SAO, North Oaks Plaza Shopping Center Community Improvement District, report number 2017-102, issued September 2017.

1. Significant Weaknesses Exist in the State's CID Laws	Significant changes to the state's Community Improvement District (CID) laws are necessary to protect taxpayers. State law allows for the formation of a CID and the imposition of taxes without adequate public scrutiny, sufficient public protections, or voter approval. Without adequate public scrutiny, district petitions are approved without a well-defined purpose for extended, and even perpetual, timeframes. State law also allows for significant conflicts of interest within the governance structure of the districts, giving significant oversight responsibilities to developers and property owners. As a result, there is an increased risk of districts not acting in the public's best interest. State law also does not ensure adequate transparency or sufficient reporting requirements, allows excess taxation without oversight, and does not contain adequate abolishment provisions.
1.1 Districts formed and taxes imposed without public scrutiny or public protections	State law allows a CID to be formed and taxes and assessments to be imposed without adequate public scrutiny or sufficient public protections. As of December 31, 2017, the state had approximately <sup>11</sup> 428 CIDs that collected \$74.3 million in taxes and assessments from the public during calendar year 2017. Estimated project costs <sup>12</sup> at the time of formation provided by 396 <sup>13</sup> CIDs totaled more than \$2.2 billion. A petition must be filed with the municipal clerk in order for a district to be established. State law <sup>14</sup> requires the petition to contain certain elements, including, but not limited to:

- The legal description of the district, including a map illustrating the district boundaries.
- A 5 year plan stating the purposes of the district, the services to be provided, any improvements to be made, and an estimate of the costs to be incurred.
- The method for selecting the board.

<sup>&</sup>lt;sup>11</sup> We do not know the exact number of CIDs in existence because there is no requirement in state law for the State Auditor's Office (SAO) to be notified upon the creation of a district. See section 1.4.

<sup>&</sup>lt;sup>12</sup> Based on survey questionnaires completed by CIDs. Some districts provided the total estimated project costs while other districts provided the estimated costs for the first 5 years of the district. Therefore, the total estimated project cost is likely significantly higher than reported.

<sup>&</sup>lt;sup>13</sup> Not all CIDs returned their questionnaire to the SAO. Additionally, several that returned the questionnaire did not know the estimated project cost when the district was formed. Therefore, we do not know the estimated project costs for all 428 CIDs.

<sup>&</sup>lt;sup>14</sup> Section 67.1421.2(3), RSMo.

State law does not require

district purpose to be well

defined

Community Improvement Districts Management Advisory Report - State Auditor's Findings

- A statement as to whether the petitioners are seeking a blighted designation for the district.
- The proposed length of time for the existence of the district.

The municipality is required to hold a public hearing and then may adopt an ordinance to establish the district.<sup>15</sup>

Municipalities do not perform While state law requires the approval of the municipality, there are no provisions requiring the municipality to perform an evaluation to ensure a district is in the best interest of the public before adopting the ordinance establishing it. As a result, municipalities do not always provide adequate scrutiny to ensure a district benefits the public.

According to representatives from the City of Kansas City and the City of St. Louis, their municipalities perform a review to ensure the petition contains all the elements required by state law. The representatives also indicated the petition for the district to form would be approved unless they identified statutory compliance issues. As of December 31, 2017, the City of Kansas City and the City of St. Louis were the approving municipalities for approximately 55 and 60 CIDs, respectively. Additionally, representatives from  $6^{16}$  of the 12 (50 percent) municipalities<sup>17</sup> we interviewed indicated they only ensured the petition was compliant with state law. Based on this information, the majority of districts created are not scrutinized by public officials to evaluate the merits of the district and to ensure the district benefits the public even though state law allows them to do so.

Amending state law to require municipalities evaluate the proposed district to ensure it appropriately benefits the public will provide more assurance districts created are in the best interests of the public. In the absence of a law change, municipalities must provide more critical review of district petition documents to ensure the interests of the public are considered.

State law does not require district petition documents contain a well-defined purpose. While state law requires the petition to state the general purpose of the district, the estimated costs to be incurred, and the proposed length of time the district will be in existence, district petition documents do not always specifically define these parameters. As a result, districts are allowed to form with vague purposes.

<sup>&</sup>lt;sup>15</sup> Section 67.1421.4, RSMo.

<sup>&</sup>lt;sup>16</sup> City of Branson, City of Independence, City of Jefferson City, City of Kansas City, City of St. Louis, and the City of Van Buren.

<sup>&</sup>lt;sup>17</sup> We attempted to interview the 13 municipalities that approved the formation of the 15 CIDs selected for further review as documented in the Scope and Methodology section above; however, the City of Northwoods failed to respond to our inquiries.

	We looked at the petition documents for the 15 CIDs reviewed and determined 10 <sup>18</sup> of them (67 percent) did not have a well-defined purpose. For example, the petition documents stated the tax revenues could be used for "payment or reimbursement of any other costs or expenses permitted by the CID Act" or some other non-specific purpose.
	Requiring the CID petition to better define the purpose of the district would provide better information to the municipality evaluating the merits of the district to ensure the district is in the best interest of the public.
Allowable life of districts not limited, resulting in excessive lifespans as well as perpetual districts	State law does not limit the allowable life of a CID and does not require the expected timeframe stated in the petition to be a defined period. As a result, districts typically have excessive lifespans, and in many cases have perpetual lifespans. Our survey determined the average lifespan for districts with a defined life is 31 years. In addition, the survey determined the state has 75 districts with no defined lifespan.
	Requiring the CID petition to have a reasonable and defined lifespan would help the municipality reevaluate whether the district is in the best interests of the public on a periodic basis. Having a defined lifespan would also allow the municipality additional oversight opportunity and would help ensure the district was fulfilling its stated purpose. Without a defined and reasonable lifespan, excessive and unnecessary taxation can occur and CID funds would be at an increased risk of misappropriation.
Districts can be established to pay TIF liabilities	A review of established CIDs identified districts created with the sole purpose of paying down tax increment financing (TIF) liabilities, thereby ensuring the developer is repaid for TIF reimbursable costs sooner than otherwise would occur. We determined 2 <sup>19</sup> of the 15 (13 percent) CIDs reviewed are associated with a TIF. These arrangements can involve most CID revenues going toward the TIF, instead of only 50 percent like other economic activity taxes. State law already includes funding mechanisms for developers to be reimbursed for TIF projects but developers/property owner(s) are establishing CIDs to provide additional funding for TIF projects.
	It is not clear if state law intended the formation of CIDs for this purpose.
No assessment of economic impact required	No estimate of the economic impact of a potential district is required prior to formation. An economic analysis of a potential district would include an analysis of the projected revenues the district would generate over time. This

 <sup>&</sup>lt;sup>18</sup> 12th & Wyandotte CID, 2317 Belt CID, Black Mountain CID, Capital Mall CID, East
 Hills CID, Hope Valley CID, Miner Gateway CID, North Oaks Plaza Shopping Center CID,
 Park Ridge CID, and Ward Parkway Shopping Center CID.

<sup>&</sup>lt;sup>19</sup> Liberty Commons CID and East Hills CID.

	information would allow the municipality evaluating the petition to determine the economic activity anticipated if the CID is established. Such information is commonly required for economic development programs. For example, prior to a TIF district being approved, a developer is statutorily required to provide information pertaining to the development's potential economic impact to the community. <sup>20</sup> Similarly, at the state level, the Department of Economic Development (DED) requires the assessment of the estimated cost/benefit of proposed projects for some tax credit programs. <sup>21</sup>
	Requiring a developer/property owner to demonstrate the estimated economic impact a potential project will generate provides assurance the investment of public monies is in the public's best interest.
No 'but for' determination required	There is no requirement that the developer/property owner(s) provide a 'but for' determination to establish a CID when the project involves a private asset. This determination is typically required to provide assurance that the project involving a private asset would not be possible 'but for' the public incentive being requested. Such a determination is required by statute to establish a TIF district, <sup>22</sup> and is required by the DED when evaluating projects applying for state Business Use Incentives for Large Scale Development Program incentives. <sup>23</sup>
	Requiring a 'but for' determination provides the public some assurance the awarding of public incentives to a project for a private asset is necessary for the development to proceed, and helps ensure the public incentives granted are in the public's best interest.
Conclusion	State law requires municipalities to approve the petition to form a CID. However, state law does not require CID petition documents to include a well-defined purpose, does not require the lifespan of a district to be limited or specifically defined, and does not require any estimate of how much revenue will be collected or an evaluation of the merits of the district. As a result, districts are collecting an unspecified amount of taxes or assessments for undefined purposes for an unknown period of time. State law allows municipalities the flexibility to modify the structure of CIDs, including ensuring the projects are well defined, and the lifespan of the district is limited before forming the district. Municipalities can review the project to ensure the same project is not already receiving public assistance. The municipalities

<sup>&</sup>lt;sup>20</sup> Section 99.810.1(5), RSMo.

 <sup>&</sup>lt;sup>21</sup> Business Use Incentives for Large Scale Development Program, Brownfield Redevelopment Program, and the Missouri Works Tax Credit Program at Sections 100.810, 447.708.1(6), and 620.2010.2(2), RSMo; respectively.
 <sup>22</sup> Section 99.810.1(1), RSMo.

<sup>&</sup>lt;sup>23</sup> Section 100.760(4), RSMo.

can also perform an assessment to ensure the district benefits the public before forming the district. However, our survey results indicate municipal officials are generally not utilizing their oversight capabilities when reviewing district petitions. Once a district is formed, the municipality has limited or no recourse if the district is not structured with adequate public protections, and districts can exist and tax the public for an infinite number of years. Clarifying state law to require petition documents to include more specific language of the district's purpose and lifespan would be in the best interest of taxpayers.

1.2 Public vote not required to impose CID sales tax State law allows sales taxes to be imposed without voter approval. During the year ending December 31, 2017, 314 CIDs received sales tax revenue totaling approximately \$57 million.

> A significant portion of CID sales taxes are not approved by a vote of the public. State law requires a CID sales tax to be approved by the qualified voters of the district after approved by the district board.<sup>24</sup> However, the majority of the districts do not contain registered voters, which allows the developer/property owner to essentially impose the tax. State law allows district boundaries to be customized so as to intentionally not include registered public voters, creating "micro" taxing districts in many cases. Only 14 percent of the districts imposing a sales tax that responded to our survey had registered voters, which would require a public vote to impose a tax. The developer/property owner(s) maintain a controlling interest in the board of directors for a majority of the districts. For those districts that imposed a sales tax and responded to our inquiry, the developer/property owner has a controlling interest on the board for 234 of the 287 (82 percent) districts statewide, and for 11<sup>25</sup> of the 12 (92 percent) districts<sup>26</sup> we reviewed. As a result, the overwhelming majority of CID sales taxes are not approved by the general public, but rather by the developer/property owner(s).

> Allowing developers/property owners and local governments to form special "micro" taxing districts and impose taxes without a public vote is inconsistent with how other sales taxes are imposed. Municipalities and other taxing districts are typically required by state law to put any proposed sales taxes to a public vote. A simple majority vote in favor of the tax is necessary to put it into effect.

<sup>&</sup>lt;sup>24</sup> Section 67.1545.1, RSMo.

<sup>&</sup>lt;sup>25</sup> 12th & Wyandotte CID, 2317 Belt CID, 76 Entertainment CID, Black Mountain CID, Capital Mall CID, East Hills CID, Hope Valley CID, Liberty Commons CID, Miner Gateway CID, North Oaks Shopping Center CID, and Ward Parkway Shopping Center CID.

<sup>&</sup>lt;sup>26</sup> Sales taxes are not imposed for 3 of the 15 districts we reviewed.

1.3 State law allows for significant conflicts of interest	State law allows for significant conflicts of interest to occur at CIDs. Approximately 83 percent of district boards are controlled by the developer/property owner(s). These developer controlled boards are responsible for procuring any construction work necessary, services to be performed, and oversight of other CID-related expenses. As a result, there is a significant risk of improper and related party transactions.
Boards are not required to include anyone independent	State law does not require anyone independent of the developer/property owner(s) to be on the board of directors if no registered voters reside within the district. While state law allows the municipality to dictate the make-up of the board before the municipality forms the district, the majority of municipalities do not require independent representation prior to approving the petition. As a result, many of the district boards do not include anyone independent of the developer/property owner. Based on our survey, the developer/property owner has a controlling interest in approximately 83 percent of district boards and 62 percent of district boards do not include anyone independent of the developer/property owner. As a result, developers/property owners find themselves with conflicting interests when representing the CID board. For example, a cooperative agreement we reviewed between the developer, the city and the district <sup>27</sup> was signed by the same individual as both the Chairman of the CID Board and the developer. Requiring someone independent of the developer/property owner(s) to be on the board of directors would provide additional assurance the district is being subjected to appropriate oversight and is acting in the best interest of the public.
Competitive procurement for most services is not required	State law does not require CID boards to competitively procure construction contracts or the majority of the services paid for with public monies. <sup>28</sup> Since there are no requirements to ensure the independence of the CID board, there is a higher risk of developer/property owner(s) awarding construction or service contracts to themselves or other related party contractors without allowing other non-related entities to submit proposals for the contracts. We identified numerous instances of contracts being awarded or payments being made to related parties:
	• The Downtown St. Louis CID did not competitively procure management services. Instead, the district paid a not-for-profit organization with representatives on the CID Board more than \$1.6 million for management

services from July 2016 to June 2017. A conflict of interest exists

<sup>&</sup>lt;sup>27</sup> Park Ridge CID.

<sup>&</sup>lt;sup>28</sup> Sections 8.285 through 8.291 and 8.675 to 8.687, RSMo, require political subdivisions to competitively procure architectural and engineering services and construction management services; respectively.

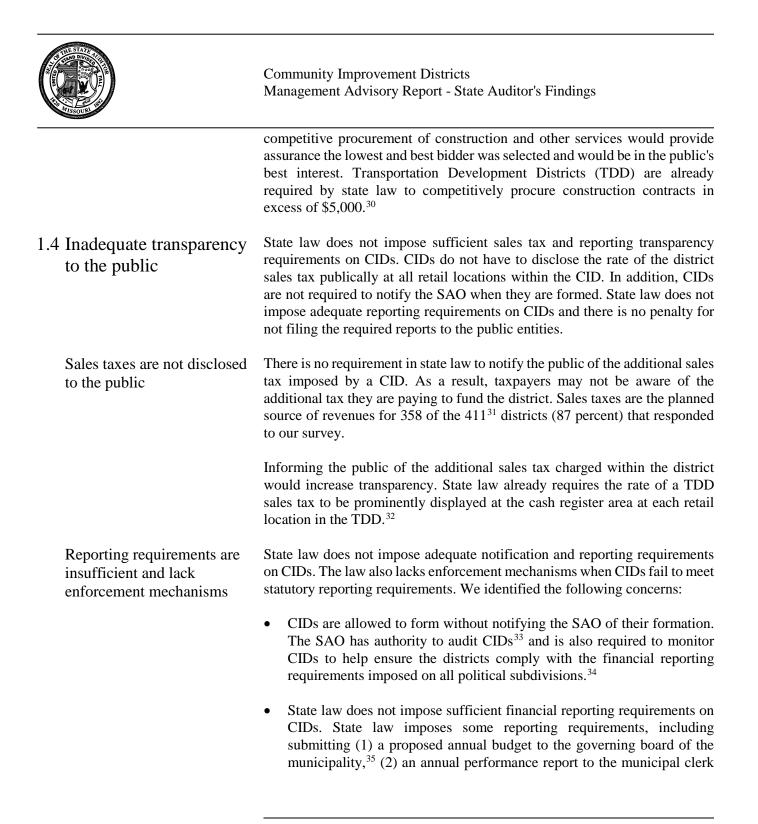

between the district and the not-for-profit organization since (1) the two organizations share the same President and CEO, (2) the Chair and Vice Chair of the not-for profit organization are ex officio members of the CID Board, and (3) the Chair and Vice Chair of the CID Board are ex officio members of the not-for-profit organization's Board of Trustees. The petition filed creating the district requires the CID to contract with the not-for-profit organization for management and to staff day-to-day operations. The CID then entered into a management agreement with the not-for-profit organization allowing the organization to determine the amount of reimbursement as long as it is within the budget of the CID and records are available for the CID Board to review.

- The Independence Events Center CID<sup>29</sup> did not competitively procure administrative services and instead contracted with the City of Independence, which had a controlling interest in the Board, to administer the district. The district paid more than \$110,000 annually since 2013 for services that other districts procure for less than \$15,000 annually.
- Ward Parkway Shopping Center CID did not competitively procure construction management services worth \$1.2 million. Instead, members of the Board of Directors approved payments for these services to their employer.
- The North Oaks Plaza Shopping Center CID did not competitively procure parking lot repair services worth approximately \$85,000. The district made payments for these services to a company owned by a Board member.
- The Park Ridge CID did not competitively procure lawn and landscaping services and paid more than \$75,000 for these services in 2017. The district made payments for these services to a company owned by the Chairman of the Board.
- The Black Mountain CID Board leased land from members of the Board for 3 years at a total cost of \$31,600 for signage for a business within the boundaries of the district. The sign being leased was constructed in 2000 with no lease payments being made to the property owners/Board members until the CID payments were made from 2015 through 2018. Board members could not explain how they determined the lease rate.

Based on survey responses submitted by 396 CIDs, districts across the state are anticipating spending more than \$2.2 billion in project costs. Requiring

<sup>&</sup>lt;sup>29</sup> The Independence Events Center CID is the largest CID in the state in terms of sales tax collection.

<sup>&</sup>lt;sup>30</sup> Section 238.252(2), RSMo.

 <sup>&</sup>lt;sup>31</sup> Representatives of 411 CIDs responded to our questionnaire and provided their planned source of revenue. No additional information is known for districts that did not respond.
 <sup>32</sup> Section 238.280, RSMo.

<sup>&</sup>lt;sup>33</sup> Section 238.280, KSMO.

<sup>&</sup>lt;sup>33</sup> Section 67.1471.5, RSMo.

<sup>&</sup>lt;sup>34</sup> 15 CSR 40-3.030(5) and Section 105.145, RSMo.

<sup>&</sup>lt;sup>35</sup> Section 67.1471.2, RSMo.

of the approving municipality and the DED, and (3) an annual financial report to the SAO.<sup>36</sup> However, these reporting requirements do not include other important information, such as:

- the funding method.
- revenues received to date.
- reimbursable costs by type to date.
- anticipated reimbursable costs by type.
- unpaid reimbursable costs.
- current estimated years until abolishment.
- State law does not have a mechanism to ensure the CIDs provide the reporting already required to the DED and the municipalities. We identified significant noncompliance with reporting requirements (see section 3.2).

Requiring CIDs to report the rate of sales tax imposed, to notify the SAO upon formation, to provide additional reporting, and adding a mechanism to state law to increase reporting compliance would increase transparency and allow the public to be better informed of these districts. Municipalities already have to report the formation of a CID to the DED<sup>37</sup> and TIF information to the Department of Revenue (DOR).<sup>38</sup> In addition, state law already imposes fines as a mechanism to ensure reporting. For example, state law effective August 28, 2017,<sup>39</sup> imposes fines to political subdivision for noncompliance with financial reporting requirements and requires those fines to be paid to local school districts.

1.5 Excess taxation without oversight State law allows CIDs to overtax the public and remit the excess taxation to conflicted parties. Additionally, state law does not require an audit by the SAO before a district can abolish.

State law does not require a district to rescind its funding mechanism once the district expenses have been paid, resulting in excess taxation of the public. State law<sup>40</sup> requires the excess taxation to go towards the real property that

Excess taxation occurs and benefits conflicted parties

<sup>&</sup>lt;sup>36</sup> 15 CSR 40-3.030(5) and Section 105.145, RSMo.

<sup>&</sup>lt;sup>37</sup> Section 67.1421.6, RSMo.

<sup>&</sup>lt;sup>38</sup> Section 99.865, RSMo.

<sup>&</sup>lt;sup>39</sup> Section 105.145.9 to 105.145.11, RSMo.

<sup>&</sup>lt;sup>40</sup> Section 67.1481.5, RSMo.

was formerly part of the district and may result in conflicted parties benefiting from the excess taxation.

For example, the Eureka South I-44 CID Board was controlled by the municipality and abolished in November 2014. Prior to abolishment, the district overcharged the public by more than \$120,000. These funds were remitted to the city and placed in the Road Fund. The city-controlled district failed to rescind the sales tax and special assessment timely and as a result, the city received the excess taxation windfall from the district.

Another example involves the Kansas Battlefield CID in Springfield that satisfied its debt in March 2015. However, due to a lack of planning, the sales tax was not rescinded until January 1, 2016, which resulted in the taxpayers being over taxed by approximately \$225,000. This excess taxation resulted in a windfall to the local municipality.

Ensuring any excess taxes collected during the closeout of a CID do not go to the entity that provides oversight would help reduce the conflict of interest faced by those charged with oversight. In addition, as previously noted, fines imposed on political subdivisions for noncompliance with financial reporting requirements are to be paid to local school districts. Similarly requiring any over collections of sales tax revenue remaining after abolishment to be remitted to local school districts would remove the conflict of interest a board or local municipality may face.

Lack of oversight of<br/>abolishmentState law does not require a district to be audited by the SAO prior to<br/>abolishment. State law41 requires a district to be file a petition with the local<br/>municipality and the governing body of the municipality to adopt an<br/>ordinance in order for a district to be abolished.

Requiring a CID to be audited by the SAO prior to abolishing would provide assurance the district's assets exceed its liabilities and the board has a plan in place for the dissolution of assets. State  $law^{42}$  already requires an audit by the SAO in order for a TDD to abolish.

1.6 Lack of reporting transparency
Annual reports of statewide CID sales tax collections and distributions published by the DOR do not include taxes distributed to all districts. The DOR redacts the amount of sales tax distributed to CIDs that include less than 6 retailers. As a result, sales tax distributions for 2017 for 109 of 314 districts (35 percent), totaling approximately \$5.4 million, are redacted from publicly available DOR reports and the appendix.

<sup>&</sup>lt;sup>41</sup> Section 67.1481.2, RSMo.

<sup>&</sup>lt;sup>42</sup> Section 238.275.3, RSMo.

State law<sup>43</sup> requires annual financial reports, including the amount of receipts, of every political subdivision of the state to be filed with the SAO. State law<sup>44</sup> also requires these financial reports to be public records. DOR officials assert Section 32.057, RSMo, supersedes this language, and the amount of money collected for CIDs with fewer than 6 businesses must be protected from disclosure to the general public so as not to disclose private taxpayer information. While the recent law change to improve financial reporting compliance of political subdivisions will improve the transparency of CIDs, this change will not resolve the DOR's interpretation of the law that results in public reports of CID distributions being redacted. To comply with DOR's reporting restrictions, some sales tax distribution amounts to individual CIDs are redacted in the appendix because the sales tax information presented in the appendix was obtained from the DOR. However, the total statewide distribution amount presented in DOR reports and our appendix includes all CID sales taxes distributed by the DOR. Clarification to state law is necessary to ensure the completeness of the distribution reports published by the DOR, and to ensure the transparency of CID tax distributions statewide. Recommendations The General Assembly consider amending state law to: 1.1 Require municipalities to perform an evaluation of petitioned CIDs and document their results to ensure a district is in the best interest of the public before adopting an ordinance establishing it. In addition, state law should be amended to require the CID's purpose and lifespan be well-defined in the district petition documents. State law should also be amended to require an assessment of economic impact be prepared and presented and require the developer/property owner(s) provide a 'but for' determination to establish a CID when the project involves a private asset. Consideration should also be given to clarifying state law regarding establishing CIDs to repay TIF reimbursable costs. 1.2 Require a public vote of the citizens to impose a CID sales tax. Require a representative of a public entity to be on the board of 1.3 directors. Also, require CIDs to competitively procure construction contracts and other major services. 1.4 Require districts to notify the public of the additional sales tax imposed by a CID and require the approving municipality to notify

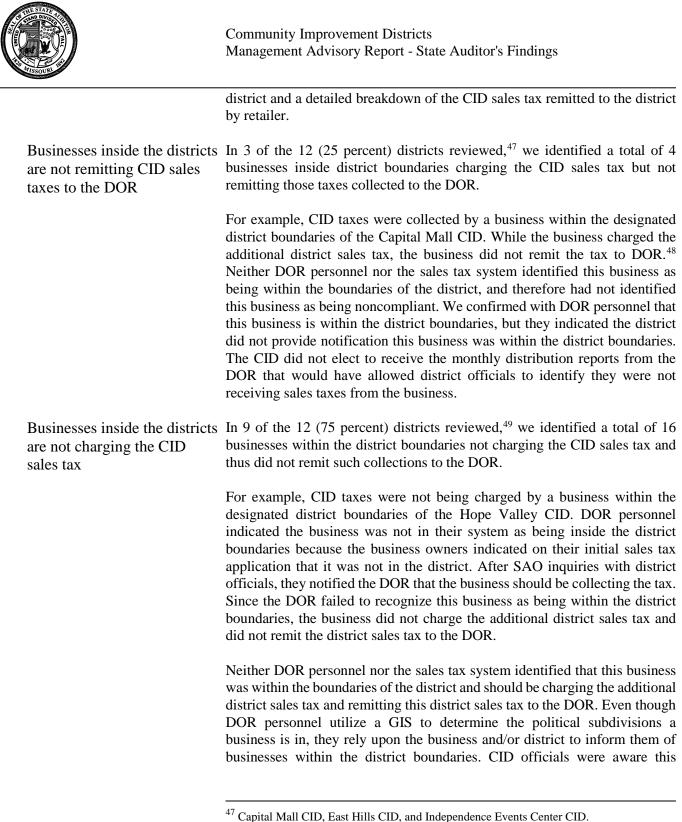

<sup>&</sup>lt;sup>43</sup> Section 105.145.2, RSMo.

<sup>&</sup>lt;sup>44</sup> Section 105.145.7, RSMo.

	<ul> <li>the SAO of a district's formation. In addition, state law should impose more detailed reporting requirements on CIDs and establish a mechanism to ensure CIDs provide required reports to the state and appropriate municipality.</li> <li>1.5 Require districts to rescind their funding mechanism(s) once obligations have been repaid and ensure excess taxation does not benefit conflicting parties. In addition, require an audit of CIDs by</li> </ul>
	<ul><li>the SAO prior to abolishment.</li><li>1.6 Clarify if sales tax distribution amounts by the DOR should be available to the public.</li></ul>
Auditee's Response	Due to no state or local entity having oversight or management responsibilities over CIDs on a statewide basis, no management response can be obtained. The views of any applicable municipalities, or individual CID board members were obtained as appropriate and considered as part of our audit fieldwork.
2. Weaknesses Exist in Sales Tax Administration	The sales tax administration system in place at the DOR does not adequately track sales tax district boundaries, and the DOR does not have adequate procedures in place to ensure district sales taxes are correctly administered, charged, collected, and disbursed. As a result, our review of the collection and remittance of district sales taxes identified errors for 10 of the 12 <sup>45</sup> (83 percent) districts reviewed for sales tax compliance. Most errors noted involved issues with the department's inability to accurately recognize CID boundaries. This condition was reported to the DOR in previous SAO audits of TDDs in 2017 and Sales and Use Tax procedures in 2015. <sup>46</sup> During the year ended December 31, 2017, the DOR disbursed \$56.9 million in sales taxes to CIDs.
	When a CID enacts a sales tax the DOR requires the district to submit specific documentation to the department including, but not limited to (1) the name of the district imposing the tax; (2) percentage of tax increase; (3) a list of business names, addresses, and Missouri sales tax identification numbers of businesses located in the district, and (4) a map showing street names and district boundaries. DOR personnel will verify the information provided by the district, update the department's tax system, which includes the geographic information system (GIS), and inform the district of the effective date of the tax. The DOR makes available monthly distribution detail reports to each district. These reports provide a listing of open businesses within the

 <sup>&</sup>lt;sup>45</sup> Only 12 of 15 districts selected for additional review were funded by a sales tax.
 <sup>46</sup> Report 2017-020, *Transportation Development Districts*, issued in April 2017, and report 2015-080, *Sales and Use Tax*, issued September 2015.

<sup>&</sup>lt;sup>48</sup> Follow up action to determine the status of any sales taxes collected but not remitted is

<sup>&</sup>lt;sup>40</sup> Follow up action to determine the status of any sales taxes collected but not remitted is beyond the scope of our audit. This matter was referred to the DOR for follow up.

<sup>&</sup>lt;sup>49</sup> 76 Entertainment CID, Black Mountain CID, Capital Mall CID, East Hills CID, Hope Valley CID, Independence Events Center CID, Liberty Commons CID, North Oaks Plaza Shopping Center CID, and Ward Parkway Shopping Center CID.

business was within the boundaries of the district and should have been charging the additional district sales tax; however, they failed to identify the business was not included on the monthly DOR reports that detail the breakdown of sales taxes remitted each retailer.

Businesses outside the districts are charging district sales tax

In 2 of the 12 (17 percent) districts reviewed, 50 we identified a total of 2 businesses not within the district boundaries charging the CID sales tax.

For example, CID taxes were collected by a business that was approximately 1 mile outside the designated district boundaries of the Miner Gateway CID. DOR personnel indicated when this business opened, the business provided the department with an address and informed them the business was within the boundaries of the district. The DOR coded the business as being within the boundaries of the district without confirming the location of the business and the district's boundaries. The business was actually outside the district boundaries and had no legal authority to collect the district sales tax based on our review of the district. The DOR remitted the taxes to the district. Neither DOR personnel nor the department's sales tax system identified this business was not within the boundaries of the district sales tax. The CID was not aware this business was charging the additional district sales tax because the district chose not to receive the monthly DOR distribution reports.

In addition, a business located approximately 4 miles outside the boundaries of the Independence Events Center CID charged the CID sales tax. DOR personnel indicated they registered this business as a business within the boundaries of the district based on a sales tax return filed by the business. The business had no legal authority to collect the district sales tax based on our review of the district. Neither DOR personnel nor the department's sales tax system identified this business was not within the boundaries of the district and had no legal authority to impose the additional district sales tax.

Conclusion The DOR imposes requirements on taxing districts, including CIDs, which are beyond what the DOR requires of cities and counties. Special taxing districts in the state are required to notify the DOR when new businesses are added, which is not required of large political subdivisions like cities and counties. DOR officials indicate the department's system is capable of identifying the applicable tax rates that should be charged by a new business in a city or county, but for smaller taxing districts, such as CIDs, the entity is responsible for monitoring for new businesses and notifying the DOR.

<sup>&</sup>lt;sup>50</sup> Independence Events Center CID and Miner Gateway CID.

Recommendation

Auditee's Response

Community Improvement Districts Management Advisory Report - State Auditor's Findings

State law<sup>51</sup> requires the DOR to perform all functions incident to the administration, collection, enforcement, and operation of the district sales tax. The DOR has a fiduciary duty to the public to ensure taxes are administered correctly and to detect and prevent improper taxation.

The DOR implement controls to prevent or detect improper taxation.

The Missouri Department of Revenue provided the Missouri State Auditor's office (SAO) detailed financial and business location reports for twelve Community Improvement Districts (CIDs). Errors were identified for ten of the CIDs reviewed. There are approximately 795 unique businesses within those 10 CIDs. The SAO discovered issues with 22 businesses, representing a 97 percent accuracy rate. The DOR has addressed all issues contained in the report and made necessary corrections to those businesses.

In September 2017, the department began using a new Integrated Tax System which interfaces with the Sales Tax Rate Geographic Information System (STRGIS). When registrations are completed, the interface with STRGIS systematically provides department staff a rate and location code associated with the business address. This will help the department identify if the address is within a district, even when the taxpayer reports they are not within a district. In the previous tax system, at the time of registration, department employees had to perform a manual check for the address in STRGIS. In some instances this manual review did not occur, resulting in incorrect registrations. This improvement should result in greater accuracy.

The DOR continues to work closely with the Office of Administration -Information Technology Services Division to ensure accurate and timely updates are made to STRGIS. In addition, in response to House Bill 1858 passed in the most recent legislative session, the department will begin working with political subdivisions to view the addresses currently located within their boundaries.

Reports that provide a list of the open businesses registered within the district and monthly distributions from each business within the CID are available to each CID free of charge. Prior to implementation of the Integrated Tax System, political subdivisions were provided one free report per year, and charged \$35 for each subsequent report requested by the CID. The department has notified CIDs of the availability of these reports.

The department requests updates from the CIDs as new businesses are added or if their taxing boundaries change. The department also requires other political subdivisions, including cities and counties, to notify the department

<sup>&</sup>lt;sup>51</sup> Section 32.087.6, RSMo.

		of new businesses as a result of annexations or if they identify any discrepancies on their reports. The department's ability to provide accurate rate for each district is limited by the completeness of information provided by each CID. It is common for districts to have undeveloped areas without addresses at the time the district is formed. If the district does not provide notification of new businesses within the district, the department does not have the ability to identify specific businesses when the boundaries do not encompass the entire city or county.
Αu	iditor's Comment	Due to incorrect boundaries in DOR's mapping system, sales tax errors were identified in 10 of the 12 (83 percent) districts reviewed, which includes 5 districts with multiple errors. Given the significant error rate found in districts reviewed as part of the audit, improper taxation is likely occurring in other special taxing districts throughout the state.
3.	Noncompliance with Statutory Requirements	CIDs have routinely not complied with state laws regarding budget preparation, annual financial and performance reporting, Sunshine Law compliance, and holding an annual meeting.
3.1	Annual budgets	CIDs routinely do not comply with state laws requiring budgets be reported to municipalities, contain certain information, and be adopted timely.
	Lack of transparency to municipalities	We determined 11 of the 15 (73 percent) CIDs reviewed did not properly adopt budgets or did not properly provide those budgets to the municipality.
		• Four <sup>52</sup> CIDs did not prepare an annual budget for the fiscal year 2017.
		• Two <sup>53</sup> CIDs prepared a fiscal year 2017 budget but failed to provide the budget to the municipality.
		• Five <sup>54</sup> CIDs failed to submit their annual budget to the municipality within the timeframe required by state law. These CIDs submitted their fiscal year 2017 budget to the municipality between 29 to 169 days after the statutory deadline.
		Section 67.010.1, RSMo, requires political subdivisions to prepare an annual budget. Section 67.1471.2, RSMo, requires CIDs to submit a proposed budget

 <sup>&</sup>lt;sup>52</sup> Black Mountain CID, Hope Valley CID, Liberty Commons CID, and Miner Gateway CID.
 <sup>53</sup> 12th & Wyandotte CID and North Oaks Plaza Shopping Center CID.
 <sup>54</sup> 2317 Belt CID, BaratHaven CID, Capital Mall CID, Independence Events Center CID, and

Ward Parkway Shopping Center CID.

	to the governing body of the municipality between 180 and 90 days prior to the first day of the fiscal year.
Budgets were incomplete	We determined 5 of the 9 <sup>55</sup> (56 percent) CIDs reviewed prepared incomplete budgets.
	• The budgets for 2 <sup>56</sup> CIDs did not contain a budget message or a general budget summary.
	• The budgets for 2 <sup>57</sup> CIDs did not contain a comparative statement of actual and estimated revenues and expenditures for the preceding 2 years.
	• The budget for 1 <sup>58</sup> CID did not contain a budget message, budget summary, or contain a comparative statement of actual estimated revenues and expenditures for the preceding 2 years.
	Section 67.010.1, RSMo, requires a CID board to present a budget with a complete financial plan to include a budget message describing the important features of the budget and major changes from the preceding year, comparative statement of estimated revenues and expenditures for the preceding 2 years, and a general budget summary.
Budgets were not approved timely	We determined $2^{59}$ of the 11 (18 percent) CIDs <sup>60</sup> reviewed that adopted a budget did not adopt their budgets timely. Those CIDs adopted their budget at least 45 days after the statutory deadline.
	Section 67.1471.3, RSMo, requires CID boards to adopt an annual budget no later than 30 days prior to the start of the CIDs fiscal year.
3.2 Annual reports	CIDs consistently failed to provide required reports to the SAO and DED.

<sup>&</sup>lt;sup>55</sup> We could only review the budgets for 9 of the 15 CIDs because the Black Mountain CID, Hope Valley CID, Liberty Commons CID, and Miner Gateway CID failed to adopt a budget. The Downtown St. Louis CID and Park Ridge CID are not-for-profit established CIDs, and Section 67.010, RSMo, does not apply to not-for-profit CIDs.

<sup>&</sup>lt;sup>56</sup> 12th & Wyandotte CID and North Oaks Plaza Shopping Center CID.

<sup>&</sup>lt;sup>57</sup> 76 Entertainment CID and Capital Mall CID.

<sup>&</sup>lt;sup>58</sup> 2317 Belt CID.

<sup>&</sup>lt;sup>59</sup> Capital Mall CID and Ward Parkway Shopping Center CID.

<sup>&</sup>lt;sup>60</sup> We could only review the timelines of approving budgets for 11 of the 15 CIDs because the Black Mountain CID, Hope Valley CID, Liberty Commons CID, and Miner Gateway CID failed to prepare a budget, and therefore could not adopt a budget in an annual Board meeting.

	Community Improvement Districts Management Advisory Report - State Auditor's Findings
Annual financial report	For their most recent fiscal year, we determined 92 of the 403 <sup>61</sup> (23 percent) CIDs failed to provide an annual financial report to the SAO and 39 of the 403 (10 percent) submitted their report late.
Annual performance report	Based on DED records, the compliance rate on performance report requirements is low. For their most recent fiscal year, we determined 163 of the $430^{62}$ (38 percent) CIDs failed to provide an annual performance report to the DED and 65 of the 430 (15 percent) CIDs submitted their report after the statutory deadline. Only 202 of 430 districts (47 percent) timely filed the required performance reports with the DED.
	Section 105.145, RSMo, requires all political subdivision, including CIDs, to file annual financial statements with the SAO. 15 CSR 40-03.030(5) requires a CID to submit the annual financial statements to the SAO within 6 months following the end of the fiscal year. Additionally, Section 67.1471.4, RSMo, requires a CID to submit an annual performance report to DED within 120 days after the end of the fiscal year.
3.3 Sunshine Law	We determined 3 of the 15 (20 percent) CIDs reviewed did not comply with the Sunshine Law by failing to prepare Board meeting minutes with all required information. We identified the following errors:
	• Two <sup>63</sup> CIDs failed to indicate the Board members present and absent in the minutes.
	• One <sup>64</sup> CID failed to indicate where the meeting was held in the minutes.
	• One <sup>65</sup> CID failed to indicate the time the meeting was held in the minutes.
	Section 610.020.7, RSMo, states minutes of open and closed meetings shall be taken and retained by the public governmental body, including, but not limited to, a record of any votes taken at such meetings. The minutes shall include the date, time, place, members present, members absent, and a record of any votes taken.

<sup>&</sup>lt;sup>61</sup> Seventeen CIDs were established as not-for-profit organizations, which are not required to submit annual financial reports. Eight CIDs were established in 2017 and did not have to submit a financial report until after our review period.
<sup>62</sup> DED indicated 430 CIDs were active as of January 23, 2018.
<sup>63</sup> 2317 Belt CID and Black Mountain CID.

<sup>&</sup>lt;sup>64</sup> Black Mountain CID.

<sup>&</sup>lt;sup>65</sup> East Hills CID.

R Amount redacted. The Department of Revenue (DOR) asserts that the amount of money collected for CIDs with fewer than 6

businesses must be protected from disclosure to the general public citing Section 32.057, RSMo.

- X The CID did not return a completed survey.
- N/A Not Applicable
- (1) Information was obtained from the DOR and is on a calendar year basis.
- (2) Information was obtained from entity survey information filed with the SAO.
- (3) No revenues collected as of December 31, 2017.
- (4) The CID reported no estimated project cost on survey information filed with the SAO.
- (5) The CID reported estimated project cost only for the initial year.
- (6) The CID has stopped collections.
- (7) The CID revenue was not reported to the SAO for the CID's 2017 fiscal year as of June 25, 2018.
- (8) The CID reported estimated project cost was for the first 5 years.
- (9) The CID has been abolished/terminated.
- (10) Use tax revenue amount; this amount was obtained from the DOR and is on a calendar year basis.
- (11) Property tax revenue amount; this amount was obtained from the CID's 2017 financial statements and is based on the CID's fiscal year end. Fiscal year ends vary by CID.
- (12) Special assessment revenue amount; this amount was obtained from the CID's 2017 financial statements and is based on the CID's fiscal year end. Fiscal year ends vary by CID.
- (13) Use tax and special assessment revenue amounts; these amounts were obtained from the DOR and the CID's 2017 financial statements, which are based on the CID's fiscal year end. Fiscal year ends vary by CID.
- (14) Use tax and property tax revenue amounts; these amounts were obtained from the DOR and the CID's 2017 financial statements, which are based on the CID's fiscal year end. Fiscal year ends vary by CID.
- (15) Property tax, amusement sales tax, hotel/motel and restaurant/meals tax revenue amounts; all amounts were obtained from the CID's 2017 financial statements. Fiscal year ends vary by CID.
- (16) Special assessment revenue amount for the 2017 calendar year. Calculated using information obtained from CID.
- (17) Special assessment revenues, use tax redacted.
- (18) Real property tax and special assessment revenues.
- (19) The CID did not report estimated projects costs on the survey information filed with the SAO; however, the CID reported actual project costs on survey information filed with the SAO. This amount represents the actual project costs.
- (20) Interest revenue, obtained from the CID's 2017 financial statements, which are based on the CID's fiscal year end. Fiscal year ends vary by CID.
   (21) Rental and other revenues, obtained from the CID's 2017 financial statements, which are based on the CID's fiscal year end. Fiscal year ends vary by CID.
